Portfolio Summary

The investment seeks long-term growth of capital primarily through investment in ETFs & equity securities deploying a core plus satellite investment strategy; current income is a secondary objective. The fund pursues its objective by investing, under normal circumstances, at least 80% of its net assets (for investment purposes) in a diversified portfolio consisting primarily of "Core" position ETFs, identified by the Fund manager as having growth characteristics. It may also invest up to 20% of its total assets in "satellite" positions primarily composed of equity securities to complement the core holdings of the portfolio. The portfolio utilizes a natural currency hedge towards the US dollar which is built into underlying holdings, protecting the overall portfolio against currency risk consisting in holding two assets whose value changes offset each other in relation to the FX fluctuations.
