

## Portfolio Overview: EUR Conservative Model

Version Date March 31, 2022

### Portfolio Overview

\* Calculations are based on \$100,000 and the chart shows the EUR equivalent

### Trailing Returns

	1 Month	3 Month	Since Inception Annualized
<b>Portfolio</b>	-0.60%	-5.82%	5.31%
<b>Dividend Yield</b>	2.87%		

### Portfolio Summary

The investment seeks to track the performance of a blended benchmark index that measures the investment return of the iShares MSCI World & iShares US Aggregate ETFs; through investment in Fixed Income ETFs & equity securities deploying a core plus satellite investment strategy; growth being a secondary objective. The fund pursues its objective by investing, under normal circumstances, at least 60% of its net assets in a diversified portfolio consisting primarily of "Core" Fixed Income ETFs, which track the performance of a wide spectrum of fixed income ETFs in the United States-including government, corporate, and international dollar-denominated bonds, as well as mortgage-backed and asset-backed securities in addition to preferred securities and convertible bonds. With the remaining 40% dedicated towards "satellite" positions of equity securities and ETFs. All of its investments will be selected through the sampling process, and at least 80% of its assets will be invested in said ETFs provided by major fund families. The portfolio utilizes a natural currency hedge towards the Euro which is built into underlying holdings, protecting the overall portfolio against currency risk consisting in holding two assets whose value changes offset each other in relation to the FX fluctuations.

### Equity Analysis
